

## **Production Engineer – Alberta/BC Business Unit – Seal Area**

Reporting to the Vice President, Alberta/BC Business Unit, this position is responsible for monitoring, analyzing and developing optimal production strategies for operated properties which include downhole work, completions, workovers and assisting the asset team with development opportunities and economic evaluations.

Primary responsibilities include but are not limited to:

- Seek ways to improve revenue generation by optimizing base production and minimizing costs
- Ensure wells are completed and operated in a safe, compliant, cost-effective manner
- Evaluate well and field performance and make improvements where possible with workovers, stimulations and facility improvements
- Procure equipment and services pursuant to Baytex's purchasing and bidding policy
- Provide input into evaluation of potential growth and development opportunities. Work with asset team to develop growth strategies
- Act as project sponsor for execution of completions operations
- Act as a liaison between field operations and Calgary staff; provide technical support to field operations and interface with staff specialists
- Review and promote the application of new equipment, techniques and report results achieved
- Provide input into the forecast of production performance to predict revenues, identify problems and plan work programs
- Provide mentorship to junior staff

The ideal candidate is a well-organized team player who demonstrates excellent interpersonal and communication skills, attention to detail, developed analytical skills and is adaptable to changing priorities. A degree in Engineering or a diploma in Engineering Technology from a recognized institution, with a minimum of 5 years experience in Production Engineering is required. Position is based in the Calgary Office.
